WARNING: Only qualified personnel may open covers or remove parts that are not explicitly described in the documentation as being accessible to the operator.

New App for MIP480

A new App for the MIP480 is available. The Version of the App is V4.0.6_VC01. The App can be used with Android 10,11,12,13 and will recognize the Android Version.

Reason:
Due to a lot of changes in the Android versions the new App is necessary to use. In newer Android Versions it is not possible to run a task in the background. So we change the Bluetooth Library and also the way to print. The App will only connect to the printer when a job should be printed. For this Reason the AutoStart switch must be switched to on every time.

As the Versions before, the App is hardcoded to 12 inch Paper.
The App can be downloaded from pour homepage as .apk file.

Action:
We recommend to use the new App due to the changes in the Android Versions.

Introduction:
The App will be available from our homepage.
