## *DC-2300*

SN-DC2300_Firmware_UCL4 or higher_005_EN

## New Firmware 30.05.00.00 available for UCL 4 or higher Printer

A new firmware version **30.05.00.00** is available for DC-2300 printers with **UCL levels 4 or higher**.
The printer's UCL level can be verified on the rating label.

**Example**: The rating label is located on the bottom of the printer.

This version is based on 30.04.00.00 and is **compatible with driver version 1.113.0.0 or higher**!

This Firmware have additional functions and solve the below issues:

- Added support for network-based UDP search and read operations via ports 9100 and 1901, ensuring backward and forward compatibility between firmware versions.
- Improvement ribbon detection after installation
- Improved the K-Ribbon data erasure function.
- Service menu: Implemented motor and sensor test functions.

**We recommend upgrading DC-2300 printers with UCL levels 4 or higher that are running older firmware versions to the latest available releases.**
