DASCOM®
SOLUTIONS FOR BUSINESS PRINTING

Mobile And Flexible

MIP480

A full-page continuous printer for multiple forms - the MIP480 is a dot-matrix printer developed specifically for mobile environments. Solutions on handheld devices and laptops are used in its operation. It combines speed, flexibility and robustness, making it the ideal output device for transport papers and other mobile applications. The MIP480 is ideal for industrial use in the area of hazardous goods, liquids or foodstuffs transport. Not only that, but it is also an attractive alternative to printers in warehousing logistics. Its use allows for the exact recording of delivered goods. Multiple forms make it possible for drivers and recipients each to receive a document detailing the actual scope of delivery.

DP-80/581

Both printers are thermal printers for A4-width continuous formats. Thanks to their razor-sharp print quality, forms, documents and graphics, such as those used in the medical sector, can be printed full-page on the spot. Alongside their print quality, these printers also offer an irresistible combination of high printing speed and quiet operation. Both printers have a robust housing, and the variety of connection options (Bluetooth, WiFi and USB) allows the user to work flexibly without being tied to one place. The DP-80, with its compact dimensions, is specifically designed for single sheets but can be used with continuous rolls. With the DP-581, the paper roll is safely located in the housing, away from dust and dirt.

DP-230L

The DP-230L is an inexpensive direct thermal printer for 3-inch receipts and labels for companies which need a lightweight yet durable printer for daily use. Thanks to its small size and powerful functions, you can use it without difficulty in a variety of applications. Its long battery life ensures that the printer can be used in consecutive shifts without any need for recharging. Thanks to its variety of interfaces including USB, Bluetooth and WiFi, the printer can be used with a whole array of systems.

DP-330/530 SE/541 SE

Mobile label printing in a vehicle or wherever the user goes - the DP-330/530 SE/541 SE are thermal printers for receipts and labels. The robust mobile printers can be attached to mounts in vehicles or on picking trolleys, making work both easy and efficient. The printers are used in particular in logistics and route accounting. The DP printers can also be carried around by their users. Thanks to their ease of operation and low weight, the user will almost forget that they are carrying a printer at all. Courtesy of various interfaces (Bluetooth or WiFi), the printer can easily be connected to a variety of systems.

DP-530si

The DP-530si is the industrial version of the popular DP-530 series. With its robust housing, vibration-damping mounting plate and vibration-resistant power supply connector for vehicle power systems, it is the ideal companion for construction or production vehicles in harsh environments. Alongside a serial connection, Bluetooth and WiFi are available as optional extras.

DPV-541

The newly developed DPV-541 is a 4-inch thermal printer which, with its compact dimensions, was specifically developed for use in vehicles, where it can be installed in standard slots in the dashboard or centre console. The printer is designed for quick and easy installation and comes just with one connection cable for power and data transmission, meaning that it is simplicity itself to wire in inside the vehicle. Along with the USB version, models with Bluetooth and WiFi connections are also available.

Advantage of mobile printers

Mobile printers by DASCOM offer a superior solution for many vehicle-related tasks. They enable the printing of wide-format sheets, which are necessary for delivery notes and transport documents. Multiple copies allow signature as a proof of receiving the goods. Our printers are not affected by the constant vehicle vibrations or rough environmental conditions and guarantee years of smooth operation

Examples of operable industries

- Hazardous Materials
- Tank Lorries
- Liquefied Gas
- Beverage Logistics
- Mobile Consignment
- Ambulance
- Police Vehicles
- Traffic Wardens

Tally DASCOM

ABOUT DASCOM

The DASCOM group was founded 1988 and is established in Hong Kong. As of today, DASCOM is a private conglomerate operating an array of business focuses. Located in Ulm (Germany), DASCOM Europe GmbH is the European headquarters and was founded in May 2009. We market the full range of serial, passbook, mobile and thermal printers under the “Tally” or “Tally Dascom” brand names.

DOT MATRIX PRINTERS

You may have thought dot matrix printers had had their day. Not so. In fact a growing number of organisations are returning to dot matrix printers, largely because of the cost benefits as well as robustness and reliability. DASCOM’s range of dot matrix printers are well matched with Microsoft Windows applications, and highly compatible with other host operation environments including legacy systems such as Unix, IBM Mainframe and AS400 (iSeries), SAP and even the many MS-DOS applications still being used.

FLATBED PRINTERS

Flatbed printers are built for task critical situations, ideal for front office applications in retail outlets, travel agents, train stations, banks and doctor’s surgeries where space is limited. They can be used for printing multi-part forms like invoices and delivery notes or cut sheet applications like printing receipts, prescriptions and documents - The Tally Dascom Flatbed printers keep transactions smooth and you will always get excellent results.

MOBILE PRINTERS

Printing requirements now extend beyond the warehouse and office into the delivery vehicles themselves. The need to print a delivery note or invoice at the same time as delivering your goods – complete with your company’s sales and marketing message of the day – is fast becoming the norm. DASCOM’s MIP480 provides wide format printing output. Multi copy provides for signatures as proof of receipt of goods. DASCOM mobile devices rigorously withstand the constant abuse of road vibration and environmental conditions guaranteeing years of trouble-free operation.

THERMAL PRINTERS

Of course, we’re already well known for our extensive range of business-class printers. Now you can enjoy this same level of excellence with our range of thermal printers. Which is great news, because thermal comes into its own in so many sectors, and for so many applications. From shelf edge labelling in retail, to specimen tracking and prescription printing in healthcare, and labelling in the manufacturing, transportation, airline, chemical and pharmaceutical industries, thermal printing makes perfect sense.

CARD PRINTERS

DASCOM card printers reliably produce printouts on a large number of plastic cards and have advantages that set them apart from other card printers. Our business devices are designed for demanding applications and larger print runs that can be output on one or both sides.
